# OPEL COMBO AND SORTIMO MOBILE WORKSHOP CONVERSIONS

## ONE STEP AHEAD WITH ORDER

Install order into your Opel Combo and as a result you will bring system into your working day. Intelligent van racking systems as well as Cases and BOXX systems from Sortimo will help you in this task. Sortimo has been developing van racking systems for over four decades and is specialist for lightweight constructions. The Globelyst equipment has allowed Sortimo to establish a highly flexible system on the market which not only puts order on your transporter but also results in markedly higher efficiency in your working day and contributes a notable addition to safety.

## SAVE TIME AND EXPENSE

The modular shelving system on the right and left hand sides of your loading area offers practical drawers and BOXXes perfectly suited for your Opel Combo which ensures that tools and consumables are always to hand and in the correct place. The shelves allow for an overview in the loading area, reduce searching times and therefore enable efficient work processes.

## LOAD SECURING AND SAFETY INCLUDED

The integrated ProSafe load securing system takes care of quick and simple lashing of your load. ProSafe load securing elements are already in the uprights of the equipment blocks as well as in the traverses. This ensures you not only prevent damage to your load, you also prevent damage to your Opel Combo. So you are guaranteed to be on the road, safely and quickly which in turn ensures better profitability for your company.
